

1. Which feature of the enterprise information portal of an intranet is responsible for ensuring secure universal access to view and use corporate and external data?
 - a. Web publishing
 - b. Business operations and management
 - c. Intranet portal management
 - d. Extranet security operations
 - e. Communication and collaboration
2. Which of these falls under the marketing business function?
 - I. Compensation analysis
 - II. Sales force automation
 - III. Inventory control
 - IV. Customer relationship management
 - V. Capital budgeting
 - a. I, II, & IV only
 - b. II, III & IV only
 - c. II & V only
 - d. II & IV only
 - e. IV & V only
3. Baxter Healthcare International's "stockless inventory" and ordering system is an example of the use of the _____ competitive strategy.
 - a. Differentiation
 - b. Cost leadership
 - c. Growth
 - d. Innovation
 - e. Alliance
4. When computers are networked, two industries converge. They are _____.
 - I. Computing
 - II. Communications
 - III. Software
 - IV. Internet
 - a. I & II only
 - b. I & III only
 - c. II & III only
 - d. III & IV only
 - e. I, II, & III only
5. The ending of the monopoly of the Telecommunications industry by either the state or a regulated private firm, has led to
 - I. Widening of the market for new telecommunications technologies and devices
 - II. Rapid change from analogue to digital network technologies
 - III. Cheaper long-distance service
 - a. I & II only
 - b. I & III only
 - c. II & III only
 - d. I, II & III
 - e. II only
6. The work of the Intranet Protocol Management applications includes
 - I. Authoring and sharing hypermedia documents
 - II. Providing a secure and universal access to view and use corporate and external data
 - III. Centrally administering clients, servers and traffic
 - a. I & II only
 - b. II & III only
 - c. I & III only
 - d. III only
 - e. II only
7. Intranets provide an enterprise information portal that supports
 - I. Web publishing
 - II. Communication and collaboration
 - III. Business operations and management
 - IV. Extranet security operations

- a. I & II only
- b. I & III only
- c. II & III only
- d. III & IV only
- e. I, II, & III only

8. In the value chain conceptual framework, the following processes are primary processes?

- I. Human Resource Management
- II. Administrative, coordination and support services
- III. Customer Service
- IV. Inbound logistics

- a. I and II only
- b. II and III only
- c. III and IV only
- d. II and IV only
- e. III only

9. Credit authorization at the point of sale using POS networks is a means of overcoming _____ barriers.

- a. Time
- b. Cost
- c. structural
- d. geographic
- e. economic

10. Groupware provides functions and services such as _____ to support the collaborative activities of work groups.

- I. software for information sharing, electronic meetings, scheduling, and e-mail
- II. a network to connect the members of the group as they work on their own desktop computers, often in widely scattered locations
- III. an interactive computer-based system to facilitate the solution of unstructured problems by a set of decision makers working together as a group

- a. I & II only
- b. I & III only
- c. II & III only
- d. I, II & III
- e. II only

11. _____ provides vital cross-functional information on business performance quickly to managers to significantly improve the ability to make better decisions in a timely manner across the entire business enterprise.

- a. Supply Chain Management
- b. Enterprise Resource Planning
- c. Knowledge Management
- d. Partner Relationship Management
- e. Customer Relationship Management

12. _____ is a business network of suppliers, distributors, partners, customers and others.

- a. Enterprise Resource Planning
- b. Knowledge Management
- c. Partner Relationship Management
- d. Customer Relationship Management
- e. Supply Chain Management

13. _____ software routes calls to customer support agents based on their skill and authority to handle specific kinds of service requests.

- a. Call center
- b. Help desk
- c. Web-based self service
- d. Customer service
- e. E-mail

14. _____ systems are installed by companies as a conceptual framework and catalyst for reengineering their business processes.

- a. Supply Chain Management
- b. Knowledge Management
- c. Enterprise Resource Planning
- d. Partner Relationship Management
- e. Customer Relationship Management

15. Business functions are to functional mainframe-based legacy systems as _____ are to integrated cross-functional client/server applications.
- Business enterprises
 - Business processes
 - Business applications
 - Business operations
 - Business management
16. _____ applications focus on providing a firm's employees with tools that support group collaboration and decision support.
- Enterprise Resource Planning
 - Supply Chain Management
 - Knowledge Management
 - Partner Relationship Management
 - Customer Relationship Management
17. Which enterprise cross-function application track business resources and the status of commitments made by the business no matter which department has entered the data into the system?
- Enterprise Resource Planning
 - Supply Chain Management
 - Knowledge Management
 - Partner Relationship Management
 - Customer Relationship Management
18. _____ provide Internet-like access to a company's operational databases and legacy systems by its customers and suppliers.
- Internets
 - Extranets
 - Intranets
 - Local area networks
 - Client/server networks
19. Customer touchpoints for CRM systems of a company include the following
- e-mail
 - The company's telephone
 - Sales department
 - Personal contact
- I & II only
 - II & III only
 - I, II & IV only
 - I, III & IV only
 - I, II, III & IV
20. At the "Enhance" stage of the Customer Life Cycle, _____ can be used most effectively.
- Customer Support
 - Sales Force Automation
 - Proactive service
 - Direct marketing
 - Cross-sell and Up-sell
21. _____ systems are information systems that cross the boundaries of the functional areas of a business in order to integrate and automate business processes.
- Enterprise application integration
 - Functional business
 - Cross-boundary functional
 - Cross-functional enterprise
 - Enterprise resource planning
22. Sales reps of a company are likely to use _____ to link to their corporate intranet in order to gain access to customer records for customer relationship management.
- the Internet
 - WAN
 - an extranet link

- a. I & II only
 - b. II & III only
 - c. I & III only
 - d. I only
 - e. I, II & III
23. The Business value of Intranets include
- I. Providing connections to suppliers and distributors for supply chain management
 - II. Using it for communication and collaboration within an enterprise
 - III. Using it to support business operations and management
- a. I only
 - b. II only
 - c. III only
 - d. I & II only
 - e. II & III only
24. Websites, Web browsers, HTML documents, hypermedia databases, and TCP/IP networks are examples of _____.
- a. Open systems
 - b. Telecommunication network components
 - c. Internet technologies
 - d. Network architectures
 - e. Network operating systems
25. Major business use of the Internet includes
- I. Interactive marketing
 - II. Collaboration among business partners
 - III. Electronic commerce
 - IV. Web surfing for multimedia information and entertainment
- a. I, II & III only
 - b. II, III & IV only
 - c. I, II & IV only
 - d. III only
 - e. I, II, III & IV
26. Which component of the CRM software helps customer service managers create, assign, and manage requests for service by customers?
- a. Retention and loyalty programs
 - b. Customer Service and Support
 - c. Sales
 - d. Human Resource
 - e. Marketing and Fulfillment
27. Using the Internet for recruitment and job hunting is an example of _____ systems
- a. Customer relationship management
 - b. Online HRM
 - c. Employee self-service Intranet
 - d. Workforce planning/scheduling
 - e. None of the above
28. _____ handles sales orders from customers.
- a. Accounts receivable
 - b. Sales force automation
 - c. Supply chain management
 - d. Order processing
 - e. Transaction processing
29. Which feature of the enterprise information portal of an intranet is responsible for authoring publishing and sharing hypermedia documents?
- a. Business operations and management
 - b. Web publishing
 - c. Intranet portal management
 - d. Extranet security operations
 - e. Communication and collaboration
30. Some of the major reason(s) for forming virtual companies is/are to
- I. Link contemporary core competencies
 - II. Increase facilities and market coverage
 - III. Migrate from selling products to selling services
 - IV. Share infrastructure and risk with suppliers

- a. I & II only
 - b. II & III only
 - c. I, II & III only
 - d. I, III & IV only
 - e. II, III & IV only
31. An organization's information architecture consists of its
- I. Information Technology personnel
 - II. computer hardware and software
 - III. telecommunications links
 - IV. data files
- a. I, II and III only
 - b. II, III and IV only
 - c. I, III and IV only
 - d. I and II only
 - e. II and IV only
32. When a firm _____, it could discourage or delay other companies from entering a market due to an increase in the amount of investment or the complexity of the technology required to compete in an industry or a market segment.
- a. builds switching costs
 - b. leverages investment in IT
 - c. locks in customers and suppliers
 - d. erects barriers to entry
 - e. lowers costs
33. Businesses can counter the threats of competitive forces that they face by implementing the following basic competitive strategies.
- I. Alliance strategies.
 - II. Cost leadership strategies
 - III. Growth strategies
 - IV. Differentiation strategies
 - V. Inbound logistics strategies
- a. II & III only
 - b. I, II & V only
 - c. I, II, III & IV only
 - d. I, III & IV only
 - e. II & V only
34. Which of these models of the firm and its environment used to identify areas of the business where information systems can provide competitive advantage focuses more on the internal rather than external opportunities?
- I. Competitive forces model
 - II. Value chain model
 - III. Virtual company model
 - IV. ERP model
- a. I only
 - b. II only
 - c. I & II only
 - d. II & III only
 - e. I & III only
35. When a firm makes radical changes to business processes with IT that dramatically cuts costs, improve quality, efficiency, or customer services, or shorten time to market it must be using _____ competitive strategy.
- a. Alliance
 - b. Innovation
 - c. Cost leadership
 - d. Growth
 - e. Differentiation
36. Which of these concepts have revolutionized plant management?
- I. just-in-time inventory
 - II. build-to-order (BTO) manufacturing
 - III. end-to-end supply chain visibility
 - IV. computer-integrated manufacturing

- a. I & II only
b. I, III & IV only
c. II, III & IV only
d. I, II & III only
e. I, II & IV only
37. Online point-of-sale and order processing systems improves _____ processes that process customer orders.
a. Customer Service
b. Inbound logistics
c. Outbound logistics
d. Marketing and sales
e. Manufacturing
38. Business Process Reengineering combines a strategy of _____ with a strategy of _____.
I. significantly lowering internal costs
II. developing unique products and services that include IT components
III. promoting business innovation
IV. making major improvements to Business processes
a. I & II only
b. III & IV only
c. II & IV only
d. II, III & IV only
e. I, II & IV only
39. Some of the key technologies that may be used by a Knowledge Management Systems are _____
I. Internet and intranet websites
II. Groupware
III. knowledge bases
a. I, II & III only
b. II & III only
c. I & III only
d. III only
e. II only
40. Supply chain process players include a company's _____.
I. Partners
II. Customers
III. Distributors
a. I & II only
b. II & III only
c. I & III only
d. I only
e. I, II & III
41. The enterprise application architecture
I. enables users to model the business processes involved in the interactions that should occur between business applications
II. provides a conceptual framework to help you visualize the basic components and interfaces of the major e-business applications
III. spotlights the roles business systems play in supporting the customers, suppliers, partners, and employees of a business.
a. I & II only
b. I & III only
c. II & III only
d. I, II, & III only
e. III only
42. A business's commitment includes _____.
I. customer orders
II. production capacity
III. purchase orders
IV. employee payroll
a. I & II only
b. II & III only
c. I, III & IV only
d. I, II & III only
e. II, III & IV only

43. Significant business benefits that Enterprise Resource Planning software brings to many companies include significantly _____
- improving the quality and efficiency of Project Management planning.
 - reducing cost of transaction processing, hardware, software, and IT support staff
 - improving their ability to make better decisions in a timely manner across the entire business enterprise
 - Reducing inventory levels
- I & II only
 - I & III only
 - II & III only
 - I, II & III
 - I only
44. Information systems can support marketing and sales processes by developing a/an _____ on the Internet and the Web.
- online point-of-sale and order processing systems
 - interactive targeted marketing capability
 - automated just-in-time warehousing system
 - integrated customer relationship management system.
 - e-commerce web Portals for Suppliers
45. Which of these Strategic Information Systems can be used as part of the Operations business process of a company?
- Customer Relationship Management System
 - Order Processing System
 - Computer-aided Flexible Manufacturing system
 - Computer-aided design system
- I & II only
 - I & IV only
 - II & IV only
 - III & IV only
 - II, III & IV only
46. A firm such as Wal-Mart could save money in the _____ activity by helping suppliers make deliveries of goods to its stores, thereby lowering the costs of warehousing and inventory.
- operations
 - inbound logistics
 - technology
 - outbound logistics
 - customer service
47. Which of these is an example of the use of the differentiation competitive strategy?
- Creating new products and services that include IT components.
 - Using IT to diversify and integrate into other products and services.
 - Using IT to manage regional and global business expansion.
 - Using IT to substantially reduce the cost of business processes.
 - Using IT to help develop unique new markets or niches.
48. When Information Technology is used to _____, then it is being used for strategic advantage.
- create a virtual organization
 - become a customer focused business
 - improve a company's agility
 - improve efficiency of everyday operations

- a. II only
 - b. II & III only
 - c. III & IV only
 - d. I, II & III only
 - e. II, III & IV only
49. The stockless inventory system is a powerful instrument for binding customers, giving the _____ a decisive competitive advantage.
- a. Customer
 - b. Supplier
 - c. Retailer
 - d. Distributer
 - e. Manufacturer
50. Which of these is an example of the use of the innovation competitive strategy?
- a. Using IT to substantially reduce the cost of business processes.
 - b. Using IT to diversify and integrate into other products and services.
 - c. Using IT to manage regional and global business expansion.
 - d. Creating new products and services that include IT components.
 - e. Using IT to help develop unique new markets or niches.
51. Which of these is/are typical characteristics of a Business Process Reengineering compared to Business Improvement?
- I. The primary enabler is statistical control
 - II. The horizon is the future
 - III. Participation is top-down
 - IV. Typical scope is narrow and within functions
- a. I & II only
 - b. II & III only
 - c. I, II & III only
 - d. II, III & IV only
 - e. I, III & IV only
52. _____ uses mobile computing networks to support salespeople in the field.
- a. Targeted marketing
 - b. Interactive marketing
 - c. Real-time processing
 - d. Cross-functional enterprise systems
 - e. Sales force automation
53. A(n) _____ is likely to serve the Human Resource Management support process of a company best.
- a. Automated inventory replenishment by supplier
 - b. Product Development Extranet with Partners
 - c. Collaborative Workflow Intranet
 - d. Employee Benefit Intranet
 - e. E-commerce Web Portal for Suppliers
54. The work of the Business Operations and Management applications of a company's intranet include
- I. Authoring and sharing hypermedia documents
 - II. Providing a secure and universal access to view and use corporate and external data
 - III. Centrally administering clients, servers and traffic
- a. I & II only
 - b. III only
 - c. II & III only
 - d. I & III only
 - e. II only
55. A _____ system is primarily concerned with collaboration and decision support.
- a. Knowledge Management
 - b. Enterprise resource Planning
 - c. Customer Relationship Management
 - d. Supply Chain Management
 - e. Partner Relationship Management

56. Sales reps of a company are likely to use _____ to access customer records for customer relationship management.

- a. an extranet link
- b. the Internet
- c. a corporate intranet
- d. EDI
- e. customer service websites

57. A customer focused business is one that

- I. Provides top quality customer service tailored to individual needs
- II. Keeps up with market trends
- III. Provides lowest prices for goods and services
- IV. Has the ability to co-opt customers in the exploitation of innovative opportunities

- a. I & II only
- b. II & III only
- c. II & IV only
- d. I & IV only
- e. II, III & IV only

58. A company can use the Internet to

- I. Create a website for interactive marketing and electronic commerce.
- II. Hold desktop videoconferences with their partners.
- III. Create Intranet links with its employees in remote offices for interactive communication, collaboration and computing.

- a. I & II only
- b. II & III only
- c. I & III only
- d. II only
- e. I, II & III

59. Which component of the CRM software helps sales, marketing, and service professionals capture and track relevant data about every past and planned contact with prospects and customers?

- a. Retention and loyalty programs
- b. Customer Service and Support
- c. Contact and Account Management
- d. Sales
- e. Marketing and Fulfilment

60. The ERP software suit will typically support

- I. Capacity planning
- II. Financial records keeping
- III. Marketing and Fulfilment
- IV. Logistics planning

- a. I & III only
- b. II & IV only
- c. I, II & III only
- d. I, II & IV only
- e. III only
