

Network Design Assignment – Rural Bank IP Addressing Given:
A rural bank with 5 branches scattered across Ghana acquired the IP address 195.143.208.133/25 from an ISP.

Questions:

1. What class is the IP address?
2. What subnet is the address on?
3. What is the NetID of the address?
4. What is the HostID of the address?
5. What is the SubnetID of the address?
6. What is the site address?
7. Give the address in its BITWISE notation.
8. What does the /25 mean?
9. Give the dotted decimal notation of the /25 and also give bitwise notation equivalent.
10. Design a suitable network for the organization ensuring the most efficient usage of addresses.

11. List all the SubnetIDs.
12. Give the subnet address that this IP address resides on (195.143.208.133/28).
13. What is the site address for the given address in question 12 above?
14. What is the NetID for the given address in question 12 above?
15. What is the HostID for the given address in question 12 above?
16. What is the SubnetID for the given address in question 12 above?
17. Draw the network diagram that can be used for the implementation of the organization's network.
